Event: On 16 July at 23:00, a moorland wildfire was reported to have affected Tintwistle Moor, Derbyshire, United Kingdom. The event is ongoing and has recently intensified, with a risk of further spread and of merging with other wildfires in the surrounding area, potentially affecting moorland vegetation and nearby infrastructure. Copernicus EMS Rapid Mapping is requested to provide wildfire extent emergency mapping to support the monitoring and management of the event.

Data sources and analysis: Pre-event image: Sentinel-2 (2026) (acquired on 12/07/2026 at 11:21 UTC, resolution 10.0 m). Post-event image: Sentinel-2 (2026) (acquired on 17/07/2026 at 11:21 UTC, resolution 10.0 m). This image is used as background image. All images are provided under COPERNICUS by the European Union and ESA, all rights reserved.

The thematic layer has been derived from post-event satellite image using a semi-automatic approach.
